Note on body-CAN communication in conjunction with Uni-Touch control system [JA1]

Dear Sirs or Madams,

Due to recent events, we would like to inform you that sales code **E89 - preinstallation for radio remote control** must be included in the vehicle equipment configuration for body-CAN communication between the body electronics and the Uni-Touch operating system.

The latest news can also be found on our website for bodybuilders at

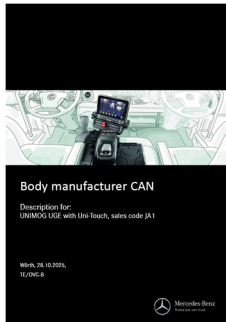

<https://bb-portal.mercedes-benz-trucks.com>

This circular is intended solely for your personal information and may not be passed on to third parties. Information correct to the best of our knowledge, however no responsibility can be assumed for its accuracy.

This Bodybuilder Information is valid as at the above date.

Without sales code **E89 - preinstallation for radio remote control**, it is currently not possible for body electronics to request vehicle information or vehicle functions that are processed via the Uni-Touch operating system (ecu's STHU and STCU2) via the body-CAN.

It essentially affects the scope listed in the **bodybuilder CAN brochure for Unimog UGE with Uni-Touch, code JA1**.

The body-CAN brochure for the Uni-Touch operating system is published in the [Mercedes-Benz Trucks Bodybuilder Portal](#) for the Unimog implement carrier model series in the additional information module

Without sales code E89, only limited vehicle information and functions processed by the XMC-control unit can be requested via the body-CAN by the body electronics. Essentially the scopes listed in the body-CAN brochure (function description of body CAN) for the Mercedes-Benz truck model series

The current body-CAN function description for the Mercedes-Benz truck model series can be found in the [Mercedes-Benz Trucks Bodybuilder Portal](#) for the Actros, Arocs, Atego or Econic truck model series in the additional information module.

We are currently checking whether body-CAN communication with the UNI-Touch operating system is also possible in future without the sales code **E89 preinstallation for radio remote control**. We will inform you of this separately.

Best regards,

Mercedes-Benz Special Trucks Bodybuilder Management Team
